

CONNECTION SUPERVISION

BENEFITS

- ATOZ Tubing Services personnel are trained for visual inspection of premium connections as well as the ability to make field repairs if suitable.
- ATOZ Tubing Services personnel will check thread and seals should be inspected prior to running to ensure the integrity of the connection.
- Supervision reduces costly re-cuts of premium connections
- Our mandate is to reduce non-productive time, and ensure manufacture specifications are achieved. Inconsistencies in quality control can result in major delays and cost while putting the well into completion.
- Maximizing rig time by enforcing a quality control process will minimize tubular problems and result in an efficient and effective solution to your casing/tubing running requirements.
